- 76) **Thermal Fogging:** For space spray, thermal fogging by technical Malathion (5 parts of Malathion in 95 parts of diesel oil) is done in urban areas. The workers involved are exposed to Malathion and generally do not use protective gears while operating the machine (referred ENVIRONMENTAL MANAGEMENT PLAN FOR THE VECTOR BORNE DISEASECONTROL PROJECT INDIA, December 2006, National Institute of Malaria Research, (Indian Council of Medical Research) 22 Sham Nath Marg DELHI-110054 [www.mrcindia.org](http://www.mrcindia.org).

What chemicals are used in fogging and how it is done? • Pyrethrum extract 2%, Malathion technical and Cyphenothrin 5% EC. Pyrethrum is plant product a. Pyrethrum space spray is used in indoor situations as space spray → Commercial formulation of 2% pyrethrum extract (a plant product) is available → It is diluted with kerosene in the ratio of one part of 2% pyrethrum extract with 19 parts of kerosene (volume/volume). → One litre of 2% pyrethrum extract is diluted by kerosene into 20 litres to make 0.1% pyrethrum formulation ('ready-to-spray' formulation). → After dilution, pyrethrum extract is sprayed with Flit pump or hand operated fogging machine fitted with micro-discharge nozzle @ 30-60 ml/1000 cu. ft b. Malathion fogging is used outdoor using insecticide Malathion technical → Thermal fogging is commonly used with diesel. The technique is based on the principle that insecticide is vaporized, which condenses to form a fine cloud of 5 droplets on contact with cooler air when it comes out of the machine. The insecticide is vaporized at a very high temperature inside the machine. Once the fog comes out of the machine, it tends to spread in different directions by mixing with wind. It is visible and psychologically more acceptable but poses traffic hazards by reduced visibility. → In ULV, no diluent is used and hence the technique is more cost-effective than thermal fogging but it does not generate a visible fog. → Cyphenothrin 5% EC- another molecule is also recommended in the programme for fogging which can be used both for indoor and outdoor fogging. • For indoor fogging, the dose is 0.5 mg a.i per sq.mt.(20 ml in 1 litres Kerosine Oil) • For outdoor, the dose is 3.5 g a.i per hectare (7 ml in 1 litres diesel).

**GUIDELINES FOR INTEGRATED VECTOR MANAGEMENT FOR CONTROL OF AEDES MOSQUITO.**

Chemical Control Chemical control measures (larvicides, adulticides) are recommended in permanent big water containers where water has to be conserved or stored because of scarcity of water or

irregular and unreliable water supply. (i) Larvicide: Since *Ae aegypti* breeds in clean water, which is stored and used for household purposes, as such all the larvicides, which are safe, without any odour or colour, have residual effect with low mammalian toxicity and do not pose any health hazard should be used. Temephos, an organophosphate compound meets all the above mentioned requirements and this insecticide is being used under the public health programme. The recommended dose for application of Temephos (50 EC) is 1 ppm (1 mg per liter of water). (ii) Adulticide: The following methods are recommended for the control of adult *Ae aegypti* mosquitoes: a) Pyrethrum spray: It may be used in indoor situations as space spray at a concentration of 0.1% - 0.2% @ 30-60 ml/1000 cu. ft. Commercial formulation of 2% pyrethrum extract is diluted with kerosene in the ratio of one part of 2% pyrethrum extract with 19 parts of kerosene (volume/volume). Thus, one litre of 2% pyrethrum extract is diluted by kerosene into 20 litres to make 0.1% pyrethrum formulation ('ready-to-spray' formulation). After dilution, pyrethrum extract is sprayed with Flit pump or hand operated fogging machine fitted with micro-discharge nozzle. b) Malathion fogging or Ultra Low Volume (ULV) spray: In application of ULV, minimum volume of liquid insecticide formulation is applied per unit area. That is, the insecticide is broken down into small droplets of a volume median diameter (VMD) of 40-80 microns with an objective of producing a cloud of insecticide droplets that remain suspended in air for an appreciable time and driven under the influence of wind. This provides maximum effectiveness against target vectors.

Since no diluent is used, the technique is more cost-effective than thermal fogging but it does not generate a visible fog. Most organophosphorus insecticides in their technical form can be applied as ULV spray. Under the public health programme, ULV spray (fogging) is undertaken by using 95% or pure technical malathion. The ground equipment mostly used for ULV spray includes portable motorized knapsack blowers and cold aerosol generators.

- 79) National Center for Vector Borne Diseases Control (NCVBDC), <https://ncvdc.mohfw.gov.in> › WriteReadData.  
 What are the anti-larvals, its availability, frequency and doses used in programme? • Temephos 50% EC is recommended at a dose of 1 ppm. Its 2.5 c.c. is mixed in 10 Lit of potable water and it is sprayed @ 20 c.c. per sq. meter surface area or 200 Litres per hectare of ready to use solution at weekly interval. Anti larval measures with Temephos granules may be applied fortnightly. • Diflubenzuron 25% WP is an Insect Growth Regulator (IGR) and its recommended dose is 25 gm a.i. per hectare in clean water and 50 gm a.i. per hectare in polluted water at weekly interval • Pyreproxifen 0.5% GR is an Insect Growth Regulator (IGR) and its recommended dose is 2 kg a.i per hectare in clean water and 4 Kg a.i. per hectare in polluted water at 3 weekly interval.

**INTEGRITY PACT IN DEENDAYAL PORT AUTHORITY**

The Central Vigilance Commission (CVC) has been promoting integrity, transparency, equity and competitiveness in transactions by various organizations of the Government of India. Public procurement is an area of concern for the CVC, and many steps have been taken to put proper systems in place. In this context, Integrity Pact (IP), a tool conceptualized and promoted by Transparency International, an international NGO, aimed at preventing corruption in public contracting, has been found useful. It has been decided by Ministry of Shipping that all organizations under the Ministry will implement IP. IP should cover every tender / procurement above a specified threshold value. The threshold value of contracts / procurements / transactions incorporating IP would be such that it covers 90% by value of all contracts / procurements / transactions of the organization in the last 3 years. Presently the threshold is fixed as ₹50 Lakhs. IP essentially envisages an agreement between prospective vendors / bidders, and Deendayal Port Authority, committing the persons / officials of both sides not to resort to any corrupt practice in any aspect of the contract at any stage. Only those vendors / bidders, who commit themselves to IP with DPA, would be considered competent to participate in the bid process. Any violation would entail disqualification of the bidders and exclusion from future business dealings. IP, in respect of a particular contract should cover all phases of the contract, from the stage of Notice inviting Tender (NIT) / pre-bid stage, till the conclusion of the contract, i.e. final payment or the warranty / guarantee period. IP would be implemented through Independent External Monitor (IEM), who are eminent persons appointed by the organization, with approval of CVC. The term of appointment for an IEM would be 3 years. Name of the IEM will be mentioned in NIT. The IEM would review independently and objectively assess, as to whether and to what extent parties have complied with their obligations under the IP. IEM would have access to all contract documents, whenever required. The bidders may raise disputes / complaints if any, with the IEM. The IEM would examine complaints received by them and give their recommendations / views to the Chairman of Port Authority. Recommendations of IEM would be in the nature of advice and would not be legally binding. Their role is independent in nature and the advice once tendered would not be subject to review at the request of the organization. Shri S.K. Sarkar, IAS (Retd.), Shri Saurabh Chaudry, IAS (Retd.) has been appointed IEM by DPA. Draft condition to be incorporated in the Draft Tender papers 1) Then bidder has to execute Integrity pact agreement with Deendayal Port Authority. As per Shri S.K. Sarkar, IAS (Retd.), Shri Saurabh Chaudry, IAS (Retd.) has been nominated as Independent External Monitor for Integrity Pact whose address is as under;
